

Job Title: Sr. Project Engineer

Job Description: Will assist Project Manager and Field Superintendent on large-scale construction projects, while maintaining the flow of project information to office and field personnel as well as all active subcontractors. Duties include planning, monitoring and supervising on-site construction engineering activities; ensuring work complies with applicable codes, drawings and specifications as well as meeting company and client requirements; coordinating and serving as project technical source with project architects, designers, owners and field personnel; interpreting design plans, specifications and construction methods; resolving questions and problems; generating Request for Information (RFI) and submittals; managing project cost controls; managing project subcontractors; analyzing, managing and issuing project change orders; and acting as the "information hub" for project to office and field personnel to ensure continuity of work.

Job Requirements: Bachelor's degree or equivalent in Mechanical Engineering, Civil Engineering or Construction Management plus five years progressively responsible experience as a Project Engineer or related engineering occupation or a Master's degree or equivalent in Mechanical Engineering, Civil Engineering or Construction Management plus one year of experience as a Project Engineer or related engineering occupation. Employer will also accept any suitable combination of education, experience or training equivalent to a Bachelor's degree or equivalent and five years of experience or a Master's degree or equivalent and one year of experience.
